

KTR UK - Company News

KTR U.K. has joined AMPS, the trade body which looks after the interests of manufacturers and suppliers of gas or diesel-powered generator systems - www.amps.org.uk

KTR has been manufacturing power transmission products for a wide range of energy sector applications, including generator sets, pumps, and compressors, for more than 50 years. KTR manufactures a range of flexible flange couplings for diesel flywheel applications, up to 90,000 TKN, covering SAI flywheels 6.5" to 24", offering single or multi-mass torsional vibration analysis with every selection.

KTR also manufacture high-speed shaft-to-shaft couplings for pump and compressor applications, OAC oil/air blast coolers, and bespoke combination coolers capable of cooling oil, air, water or fuel simultaneously within one unit.

Its Marketing Manager, Rod Sarich, said: "We're delighted to be joining AMPS, which will give us the opportunity to showcase KTR's capabilities to industry professionals, but also build relationships and share ideas and best practice with our peers.

"We've been manufacturing couplings and supplying them into the global markets for more than 50 years and being in AMPS also gives us the opportunity to share some of that experience and expertise with our fellow members."

AMPS – the Association of Manufacturers and Suppliers of Power Systems and Ancillary Equipment– is the trade association and industry voice for the UK's world-leading diesel and gas-engine power generating sector.

Its members range from global FTSE 100-listed companies to sole-trader manufacturers. AMPS was formed above a pub in 1986 and has been providing technical guidance, lobbying support, networking opportunities and best-practice assistance for our members and the industry ever since.

AMPS Director-General Paul Blything said: "We're delighted to welcome KTR Couplings as one of our newest members of AMPS and look forward to a mutually-beneficial relationship.

"Its experience and global connections will be a huge asset to the association and I imagine that other AMPS members will be looking forward to networking with KTR U.K."
